About

Fourth-year, seventh-semester Electronics and Communication Engineering student at SDM College of Engineering and Technology, Dharwad, with hands-on experience in engineering projects, embedded systems, and emerging technologies. Also experienced in UI/UX design and filmmaking, combining technical problem-solving with creativity, communication, and teamwork. Eager to apply my skills, learn continuously, and contribute to innovative solutions as a System Engineer.

Technical Skills

Programming Languages: Python | C
Developer & Engineering Tools: VS Code
Design Tools: Figma | UI/UX Design

Projects

AI-Based Smart Surveillance System | *Python, YOLOv8, OpenCV, Raspberry Pi* **Mar 2026 – Apr 2026**

- Built an AI system that detects suspicious activity from live video.
- Used the YOLOv8 object detection model with OpenCV and PyTorch to analyse each video frame.
- Ran the system on a Raspberry Pi camera, so it can monitor a location on a small, low-power device.
- Sends security alerts automatically through a Telegram bot.
- Optimised the code so it runs smoothly on limited hardware.

Smart Navigation Stick for Visually Impaired | *Python, Embedded, IoT* **Aug 2025 – Dec 2025**

- Built an IoT navigation aid that helps visually impaired people move around more independently.
- Wrote Python code that reads sensor data to detect obstacles in real time.
- Added GPS and sensors so it can guide users both indoors and outdoors.
- Connected a Raspberry Pi with external sensors so all the parts work together.

TAGX – Creative Services Marketplace App | *UX Research, Mobile UI, Figma* **Ongoing**

- Designed a mobile app that connects clients with local creative professionals in Dharwad, Hubli and Belagavi.
- Interviewed 6 users and used their feedback to shape the features.
- Planned the app structure, with two onboarding paths for different user roles and a 5-tab navigation.
- Built a token-based design system in Figma (25 colour tokens, 3 button sizes), along with wireframes and an interactive prototype.

Leadership & Experience

Media Team Lead – SDMCET Dharwad **2023 – Present**

- Lead the college media team for major technical and cultural events.
- Manage event promotions, photography, videography and digital content.
- Work with other teams on branding, visual design and social media growth.
- Handle creative planning, task distribution and event execution.

Awards & Certifications

- Python Workshop – AI in 50 Lines of Code, Google Developer Student Clubs (GDSC), SDMCET. Hands-on workshop on Python-based AI.
- Best Designer – FIGMAVERSE Workshop, QWERTY.I/O & SDMCET Dharwad. Recognised for UI/UX design skills using Figma.
- AI Tools Workshop, be10x. Practical training on AI tools and real-world applications.

Education

SDM College of Engineering and Technology | *Electronics and Communication Engineering* **Nov 2023 – Jun 2027**
Dharwad, Karnataka |

JSS PU College | *PUC (Pre-University Course)* **Jun 2021 – Apr 2023**
Dharwad, Karnataka |

JSS Public School | *SSLC (Secondary School Leaving Certificate)* **Jul 2017 – Apr 2018**
Dharwad, Karnataka |
